

Understanding place value to 999

FOCUS

3-digit numbers are made from hundreds, tens and ones.

$$873 = 800 + 70 + 3$$

Use counters to make different numbers by placing them on this abacus.

A. Use three counters:

1. make the largest number
2. make three different odd numbers
3. make two numbers between 200 and 300
4. make as many different numbers as you can with the three counters

B. Use four counters:

1. make the smallest number with all four counters
2. make five different even numbers
3. make three numbers between 300 and 400
4. make as many different numbers as you can with the four counters
